

Blasting & Coating

Swire Oilfield Services provides blasting and coating services for a variety of equipment and materials from our bases across Europe, Africa, America, Brazil, Australia, South East Asia and the Middle East.

Our in-house facilities enable us to offer efficient and cost effective methods of preparing structures and applying protective coatings to ensure a high quality finish.

Key Services

Asset Inspection & Repair Recommendation

- > Our certified coating inspector can survey equipment onsite and recommend the necessary repair, whether a localised repair can be carried out or if full blast and paint is required to achieve maximum protection and coating longevity

Surface Preparation

- > Materials such as aluminium, carbon steel, galvanised steel, shop primed steel and stainless steel substances can be prepared at the highest standard for coating

Blasting & Coating

Coating Application

- > Specialising in the application of anti-corrosive and high performance coatings via airless spray

Testing

- > We have substantial experience in carrying out destructive testing to validate coating performance, and we can conduct these tests in-house and produce a test report
- > If required, accelerated corrosion testing can be carried out via our external testing provider

Quality

- > Each stage of the blast and coating process is inspected and documented to ensure the work is carried out to the highest standard
